The following is an examiner's statement of reasons for allowance: The prior art fails to teach a driver circuit for an electro-optical device and its method, among other features, comprising: a plurality of pixels; a plurality of scanning lines; a plurality of signal lines in each of which a multiplexed data signal for first to third color components is transmitted; a plurality of demultiplexers, each includes first to third demultiplexing switch elements respectively controlled by first to third demultiplex control signals with one end of each element being connected to one of the signal lines and the other end being connected to a pixel for the color component among the plurality of pixels; a gate signal generation circuit generates a gate signal output to one of the scanning lines by using the first to third demultiplex control signals and generates a shift clock signal based on the control signals, shifts a start pulse signal based on the shift clock signal to obtain a shift output and outputs a signal corresponding to the shift output to one of the scanning lines.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

1) Katase 6,650,462 discloses a circuit for driving electrophoretic display and electronic device and its method comprising a plurality of switching elements.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Que T. Le whose telephone number is (571) 272-2438.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Epps Georgia, can be reached on (571) 272-2328. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
